**YOUR OFFICE, YOUR WAY, IN YOUR TIME**

Connect365

Introducing Connect365

Managed Service

A flexible, scalable and cost effective IT solution for business. Integrating our IT services with the Microsoft Office 365 platform to give you the best of everything; your own managed secure network, a solid email system, the latest version of Microsoft Office, as much secure storage as you need and access to all of your essential programs and applications - regardless of location or device.

Underpinned by automatic monitoring, reporting, back-ups and disaster recovery procedures. And supported by a team of qualified engineers in our professional IT Helpdesk.

The Connect365 Cloud

Managed by London Systems in a secure Data Centre, Connect365 hosts your IT systems in the Cloud. This means that you don't need a costly server taking up space and using lots of power. You won't worry about back-ups, complaints about remote access and maintenance contracts.

Working in the cloud provides you with a secure environment for all your team, regardless of where they are. It keeps IT costs lower due to no on-site server, provides greater capacity for storage and means you'll have business continuity when you need it.

Your office, in your way, in your time

Inside Connect365

What's included;

- 250GB of managed file storage as standard, with more available if you need it.
- Mapped network drives; we configure, label and set permissions as you want them.

Latest version of Microsoft;

- Outlook with 50GB storage per mailbox and enhanced capabilities.
- Direct Access automatically connects to your network while you're working remotely. Any work you do off-line will be updated once an internet connection is made.
- Word for document collaboration, creation and editing.
- Excel for more helpful, faster and useful workbook tools.
- PowerPoint with enhanced functionality.
- Skype for Business provides instant messaging, online meetings, audio and video calling.
- OneNote is a digital notebook for capturing, storing and sharing.
- Access is now a web app that makes building and using databases easier.
- Publisher with enhanced tools for graphics and text.
- OneDriveis for storing and sharing information, like a library.

Plus

- Websecure defends against malware.
- Connect365 can be accessed via a Windows PC or Laptop, Smartphone, Android tablet or iPad connecting via our powerful Virtual Desktop.

Your office, in your way, in your time

Peace of Mind

Microsoft Gold Partner
We are a Certified Microsoft Gold Partner which means we are qualified to support the Microsoft platform and associated software. We also have access to the Microsoft technical escalation process should it be necessary, and you will always talk to one of our IT Helpdesk qualified engineers.

Maximum Security
We have high standards of data security and use multiple Data Centres in separate locations as storage. Every element of our network is monitored 24/7/365. Early warnings allow us to act proactively and resolve minor issues before they cause major problems.

Mailboxes are stored on the Microsoft Office 365 platform with automatic spam and virus scanning, it is generally recognised as one of the most secure Cloud platforms available today.

Security First
We use a combination of anti-virus and anti-spam to help keep your data secure and maintain all manufacturer approved patches and software updates. Websecure malware defence control for internet access.

Device Security
We work with you to create policies that ensure that all information is protected, password policies are enforced and devices can be wiped remotely in the event of being lost or stolen.

System and Email Uptime
We migrate your network into our secure Data Centre and utilise Microsoft Servers to host your mailboxes. An overall increase in stability which reduces the risk of system downtime.

Your office, in your way, in your time

Connect365 Benefits

Business Benefits Checklist

- Increased IT ROI
